VNH

EXPLORE NEW HORIZONS.

ABT-CAMPER.COM

"Time to break free"

LEAVE YOUR COMFORT ZONE. AND DISCOVER AN EVEN BETTER ONE.

We spend more than enough time in places where we'd rather not be. Open-plan offices, waiting rooms, departure lounges. Enough of that. It's time to break out. But how? Hotels are rarely located beside the most beautiful alpine lakes. Camping is romantic, but not really comfortable. Motorhomes may be reasonably comfortable, but they are not designed for the narrow streets in your favourite Italian village or the dense city traffic. DIY camper conversions are a charming option. At least for all those who have a lot of time for tinkering and have manageable demands for comfort. But how can freedom and comfort be combined? Of course, with a 5 star hotel that is exactly where you want

it – every day anew. The **ABT XNH** is just that: A high-end dual use camper for those who want to expand their horizons. For all those for whom maximum comfort is the ultimate form of freedom – in everyday life and leisure.

The good news: Unlike most motorhomes or campers, the XNH is available with highly functional design furnishings, an efficient photovoltaic system on the pop-up roof for self-sufficient travel and complete living comfort in the optimally insulated interior.

ABT XNH – EXPLORE NEW HORIZONS.

EXTERIOR

SIT BACK AND ENJOY THE VIEW.

The Bulli is an icon. And the current version, the VW T6.1, perhaps the most popular vehicle for camper conversions – and the basis for the ABT XNH. The interior design has been done by the iconic camping company **Vaning**, and

VW Group Services, the special vehicle expert par excellence, build the campers. So you get yourself not only one of the most sought-after dual use vans, but also probably the most exclusive version ever built.

An elegant shade provider.

The optional premium Thule Omnistor 4200 awning provides a shady spot in no time – thanks to its patented cloth roller support, 200 cm pull-out and perfect support foot fixation.

A masterpiece:

The ABT XNH rim.

Its good looks steal the show: The ABT XNH 18" in Glossy Black.

Your Explorer tyres.

The Goodyear Eagle F1 Asymmetric 6 in 255/45 R18 103Y is predestined for your trips.

Eye-catching off the beaten track.

Topographic lines on modern Ascot grey make the XNH a real eye-catcher – even in front of the most beautiful sunset.

A travelling feat for the eyes.

We've given the XNH an ABT aerodynamics package that includes a front grille, rear skirt, front skirt and side rails. Another advantage: Everyone on the street benefits.

Mini power station.

The compact, complete LPS II solution provides you with a lithium battery, inverter, solar charging controller and fuse. The stats: 1900 Wh battery capacity, 2300 W output power and 400 W MPPT solar controller. Plenty electricity for your travels.

Your electricity supplier: You.

The pop-top roof 292 from industry leader SCA not only impresses with its panorama tent fabric, smart ventilation concept and insulation integrated into the roof shell, but also with up to 352 Wp PV capacity.

Plug & Travel.

The Melf-Box makes charging child's play – thanks to its voltage-free pins, real-time charging status display and a start warning when the plug is connected.

RE-CHARGES YOUR BATTERY. AND HIS TOO.

The powerful and compact all-in-one solution with lithium battery provides the XNH with power without the need for additional equipment. This, by the way, comes from powerful solar modules on the pop-up roof. The e-expertise for this comes from the countless e-mobility projects that ABT e-Line has put

on the road in the last decade. With the dual use van, you travel completely self-sufficient for a certain period of time. How long depends on the strength of the sunshine and how often you use the induction hob.

1. Creates legroom and headroom.

Thanks to its pop-top roof, even basketball professionals can stand and lie down in the ABT XNH – without disturbing their fellow travellers. Mosquitoes and other insects cannot penetrate the integrated fly screen.

2. External looks also matter.

With the ABT rear skirt, the foiling comes into its own.

3. Sporty looks.

The ABT front skirt showcases the XNH perfectly.

4. Every camper must have one: the grille.

The discreet ABT logo is positioned elegantly in the sporty front grille.

5. Everyday eye-catcher.

Whether in town, in the country or by the river, the deep black ABT XNH rim attracts everyone's attention.

"Break new ground."

Maximum insulation.

The ABT XNH uses a special blend of sheep's wool and recycled material. This makes the insulation friendly to the environment and extremely unfriendly to the cold. We have filled every hollow space, no matter how small – with layers up to 8 cm thick.

INTO THE WILD. WITH YOUR SUITE ON WHEELS.

The dunes tower behind you, the campfire crackles and on the horizon, the setting sun plunges the sky into a glowing purple. All is silent except for flying sparks and breaking waves. And the silence screams freedom. The perfect moment. Should the night become too cold, retreat to the cosy and warm liv-

ing room that you brought with you, even at sub-zero temperatures. Say warm thanks to its insulating glass windows, high-tech insulation, a spacious interior, heated seats in the cab, remote-controlled auxiliary heating and practical thermal mats for all windows.

Flock & Roll.

GRP instead of sheet metal is already an enormous quality improvement. But this is not enough for us: All side walls in the XNH are flocked and buttery soft to the touch. This pleasant feel turns the space into a living room.

Next Level GRP.

Of course, you don't see the insulation. It is located behind high-quality GRP from Hahlbrock. The glass fibre-reinforced plastic is otherwise used in refrigerated vehicles, research facilities or pool systems on luxury yachts. The specialist from Lower Saxony manufactured the lightweight and highly stable moulded parts especially for us.

Your space miracle.

The best-selling California, to the chagrin of many fans, is not available with a long wheelbase. The ABT XNH is therefore the coveted vehicle if you are literally looking for maximum comfort: 40 cm more space for comfortable sleeping and living. Urban driving, parking and manoeuvring feel just as comfortable – thanks to the integrated parking pilot.

FORM FOLLOWS FUNCTION. AND YOU FOLLOW YOUR INNER COMPASS.

Whether it's a shopping trip with the children, a family outing to the lake or a surfing trip to the Atlantic: The versatile furniture system with lightweight aluminium substructure and real wood fronts, together with the floor covering and the canopy cladding, ensures a pleasant indoor climate. As an expert for high-quality conversions, Vaning knows the needs of the market and implements them with fresh ideas, an integrated approach and outstanding design. The furniture specially developed for the XNH is perfectly co-ordinated, and the materials are all top-quality: Scratch-resistant and easy-care HPL, along

with hand-selected real wood panels – calibrated for maximum accuracy of fit. This creates a living space that is harmonious down to the last detail. Each edge is chamfered and ground, and we have given every visible surface a painstaking finish. Even the non-visible surfaces are machined. This quality claim is unparalleled in the industry. You see and feel this at every moment. The ABT XNH is equipped with 5 seats, including a rotating passenger seat, and offers space for the whole family in everyday life.

1. Designed around the bench seat.

The same applies to the Reimo bench seat: The complete rebuild means that we use every cubic millimetre, and integrate the bank seamlessly into the living space at the same time. The practical sideboard provides additional comfort features in the form of a cup holder and USB sockets, while the rail system ensures easy movement.

2. A must-have for every wardrobe: The floating bag.

The specially made bag features two-part construction: One section is connected to the bench seat and “floats” above the floor. The second part is removable and can be stowed in the main part.

3. Storage space. As a design element.

The integrated approach utilises all areas of the vehicle, creating maximum storage space and functionality in limited space. For example, in the side cabinet with its numerous storage compartments.

4. Light creates atmosphere.

High-density LED strips ensure optimum and consistent lighting. The result: A pleasant atmosphere in the living room.

5. Music and brightness – dimmable.

The multifunctional KOOKOO MoriMori dimmable LED light not only delivers up to 10 hours of brightness, but also serves as a portable Bluetooth speaker with crystal clear sound.

SLEEP WIDE. ON YOUR OWN FOUR WHEELS.

Relaxing travel all comes down to sleeping well. And if you want to sleep well, you usually need three things: a comfy base, sufficient space and a pleasant soundscape. The XNH provides all three components. Beds for four people

provide plenty of space for relaxing dreams for you and your family. This is because the sustainable insulation and the special insulating glass not only keep the cold at bay, but also any disturbing noise.

2.

1. Ground floor bedroom.

The Reimo V3000 bench seat is quickly converted into a bed: Fold the seat down, unlock the backrest and then fold it down. The super-comfortable bed base is ready – at 200 x 130 cm.

2. Upstairs bedroom.

A sleeping area of 201 cm by 106 cm is created in the raised sleeping roof SCA 292. The plate spring solution on a slatted base is comparable to the sleeping comfort of modern hotel beds.

4.

3.

3. Bedtime story.

The ultra-flexible and dimmable gooseneck reading light enables you to read your favourite book at any time of the day or night. And the two built-in USB-A sockets allow you to charge your smartphone and smartwatch at the same time.

4. A blindfold for your windows.

Summer or winter: Project Camper's temperature-regulating thermal mats for all windows ensure a pleasant sleep without disturbing light, and feature an easy magnetic window attachment, a practical panner and innovative folding seam for a night-time breeze of fresh air.

ROAD CUISINE. FEEL FREE TO TRY IT.

When you're on the road in the ABT XNH, of course you can also eat at the mountain hut or the beach bar. But home-cooked is often the best. Especially when the kitchen is equipped with everything you need. For example, space for all your favourite ingredients: A drawer, cutlery drawer, three shelf compartments and the side cabinet provide enough space for pasta, pes-

to or pumpernickel. However, the best place for your pistachio ice cream is your Dometic CRX 50 S compressor refrigerator with a 45-litre capacity. Once everything is in its place, the practical dining table with bracket and telescopic leg comes into play. We say: Enjoy your meal!

1. 3-star kitchen on 4 wheels.

With the Caso Ci3 premium two-burner induction hob, exclusively adapted to the ABT XNH and LPS II, your pans instantly reach operating temperature. Beneath it are the hidden table bracket and the practical cutlery drawer.

2. Water flows.

The brushed stainless steel washbasin with high-quality oak chopping board cover has been specially designed by Vaning for the XNH – including a swivelling tap, mixer, fresh and waste water canister. The special feature: The innovative shape ensures that water is drained at any angle of inclination.

3. Clever spice storage.

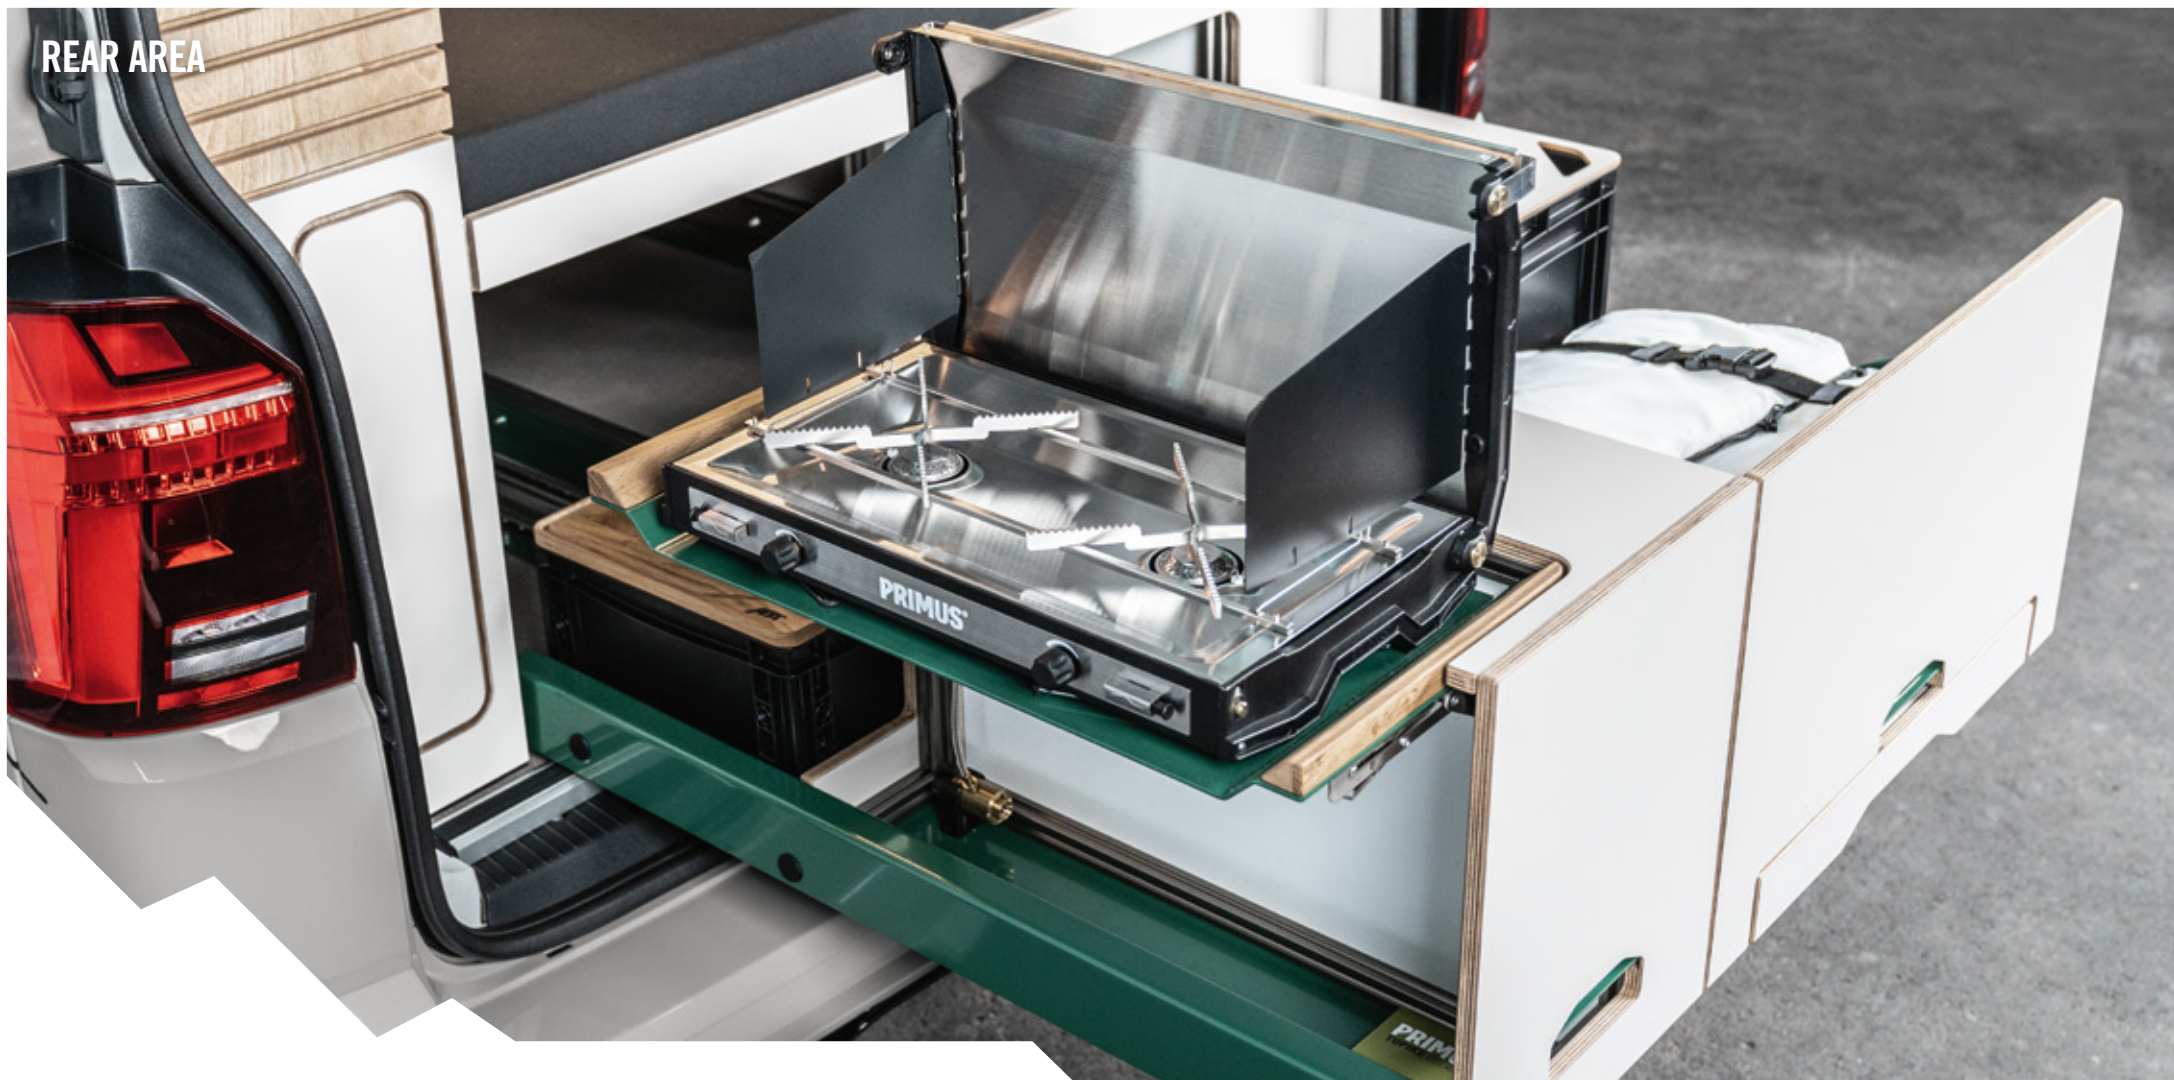

The lockable spice rack scores highly with its magnetic attachment for the spice containers, and custom-fit slot to make your kitchen knife disappear elegantly into the side wall.

4. The control centre.

A 230 V mains socket with double USB sockets powers your kitchen. The work light, shelf lighting and the dimmable ambient light can be controlled comfortably via the switch panel.

5. Storage can be so stylish.

The powder-coated shelf with LED work lighting underneath the board creates additional cooking comfort.

ALWAYS A GREAT IDEA: BACK COOKING.

The rear section of the ABT XNH sets new standards – including simple one-handed operation. The two pull-outs fit seamlessly into the living room and offer you plenty of storage space and an additional kitchen. Washbasins, cutting boards and gas stoves bring your cooking skills into the open. The

spices from the living area bring the necessary spice into play. Alternatively, you can store salt, pepper, oil and vinegar in the heavy-duty pull-out next to pots, pans, potatoes and beverage crates.

1.

1. Space for heavy equipment.

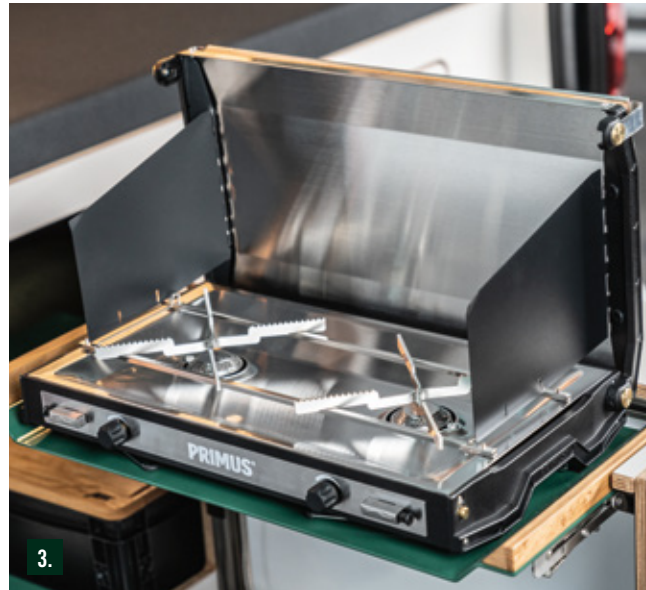

With a load capacity of over 200 kg, the split heavy-duty pull-out offers storage space for two fully packed Euro containers – thanks to its 90 cm pull-out length. The practical folding table for the living area is also incorporated here.

2. Universal storage.

To store your camping utensils conveniently and safely, two Euro containers are provided, one large, one small, in the heavy-duty pull-out. Practical and smart: The cover of the small box is an oak chopping board.

2.

3.

3.

4.

3. Outdoor cooking with the rear kitchen.

A Primus Tupike gas stove, chopping board, Fiskars axe and waste bin provide everything you need for a relaxed outdoor cooking experience.

4. Let there be light.

We've integrated two stylish LED spots into the tailgate so you never have to work in the dark. As soon as you close the trunk, the light goes out.

CHOOSE YOUR WAY. AND START EXPLORING.

The ABT XNH offers you massive comfort and space with its long wheelbase and high-quality interior. Refer to our table to see which accessories are perfect for you, your everyday life and your travels.

Fuel consumption combined in l/100 km: 8.0; CO₂ emissions combined in g/km: 210 (WLTP values).*

*The specified fuel consumption and emission values have been determined according to the legally prescribed measurement procedures (WLTP). Additional equipment and accessories (add-on components, tyre format, etc.) can be used for relevant vehicle parameters, e.g. weight, rolling resistance and aerodynamics change and, in addition to weather and traffic conditions as well as individual driving characteristics, affect the fuel consumption, power consumption, CO₂ emissions and performance values of a vehicle. Further information on the official fuel consumption and the official specific CO₂ emissions of new passenger cars can be found in the „Guide on the fuel consumption, CO₂ emissions and energy consumption of new passenger cars“, which is available at all sales points and at DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Str. 1, D-73760 Ostfildern or at www.dat.de/co2.

Our vehicles are equipped with summer tyres as standard. Since 4.12.2010, in the Federal Republic of Germany, you must fit your vehicle with M+S tyres or all-season tyres in the event of ice, slippery snow, slush, ice or frost.

The vehicles and texts shown may contain or describe equipment that is optionally available at an additional cost.

EQUIPMENT

ELECTRONIC ASSISTANCE SYSTEMS

Navigation system	Discover Pro
Driver's and front passenger's airbags, with front passenger's airbag deactivation	•
Rear view camera and ParkPilot at the front and rear	•
